Begin by logging into your account at cdxauto.com and navigating to your CDX home page.

Then, from the navigation on the left, click on the course that countains the assignment you would like to change display settings for.

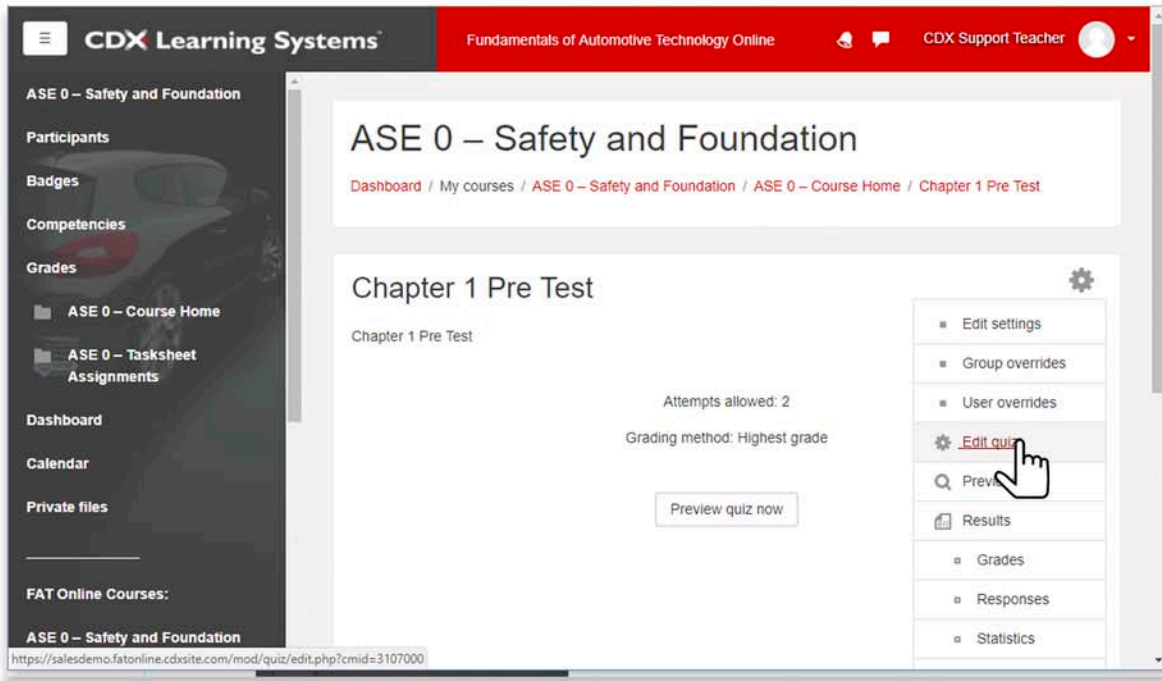

Navigate to that assignment and click on it.

This will open the quiz in a new window.

Find and click on the gear icon in the upper right corner of the page, then select **Edit Quiz.**

By default, your quizzes are set to display one question per page. If you would like to change the number of questions per page, click on the **Repaginate** button.Then select the number of questions you'd like to display per page, and click Go

By default the questions will appear in a shuffled order.

If you would like the questions to appear in a specific order, uncheck the **Shuffle option**.[1]

If you would like to change the order that questions are displayed. Find the icon next to the question that looks like a 4-way arrow, click and hold on that icon, and drag the question to where you'd like it to appear.[2]

When you are finished adjusting these settings, click on the **save button** to finalize the setting changes.[3]
