Begin by logging into your account at cdxauto.com and navigating to your CDX home page.

Then, from the navigation on the left, click on the course that contains the assignment whose settings you would like to modify.

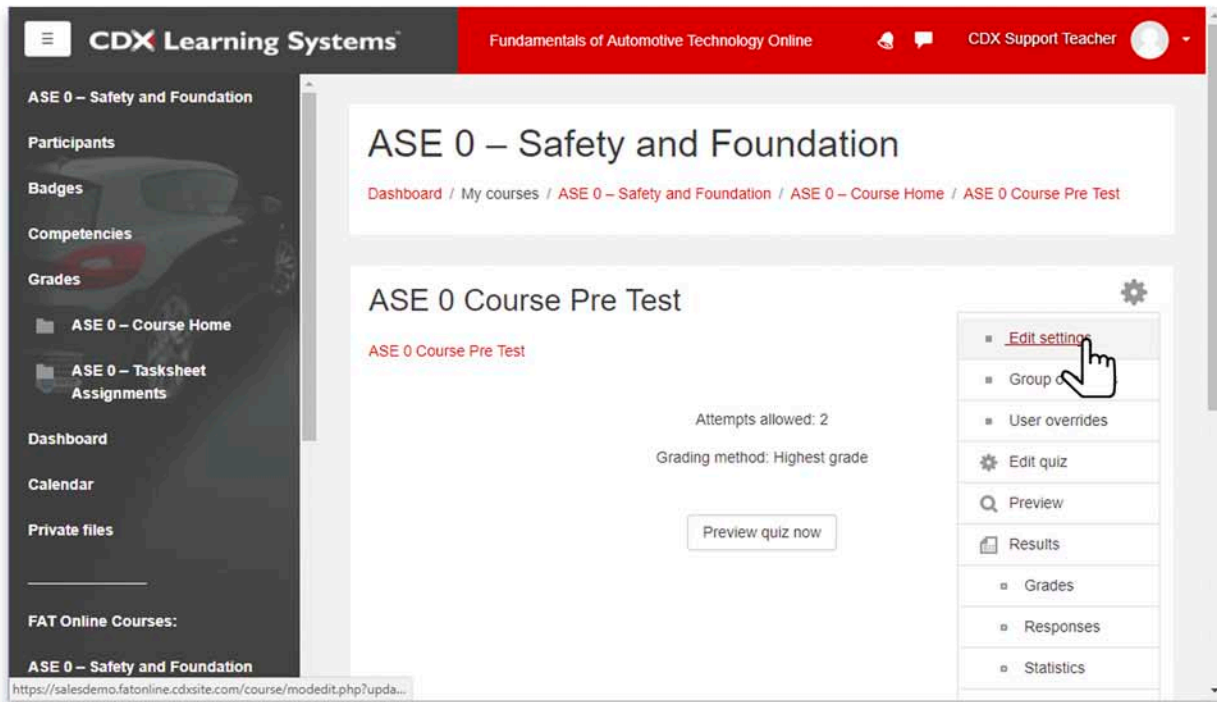

Navigate to that assignment and click on it.

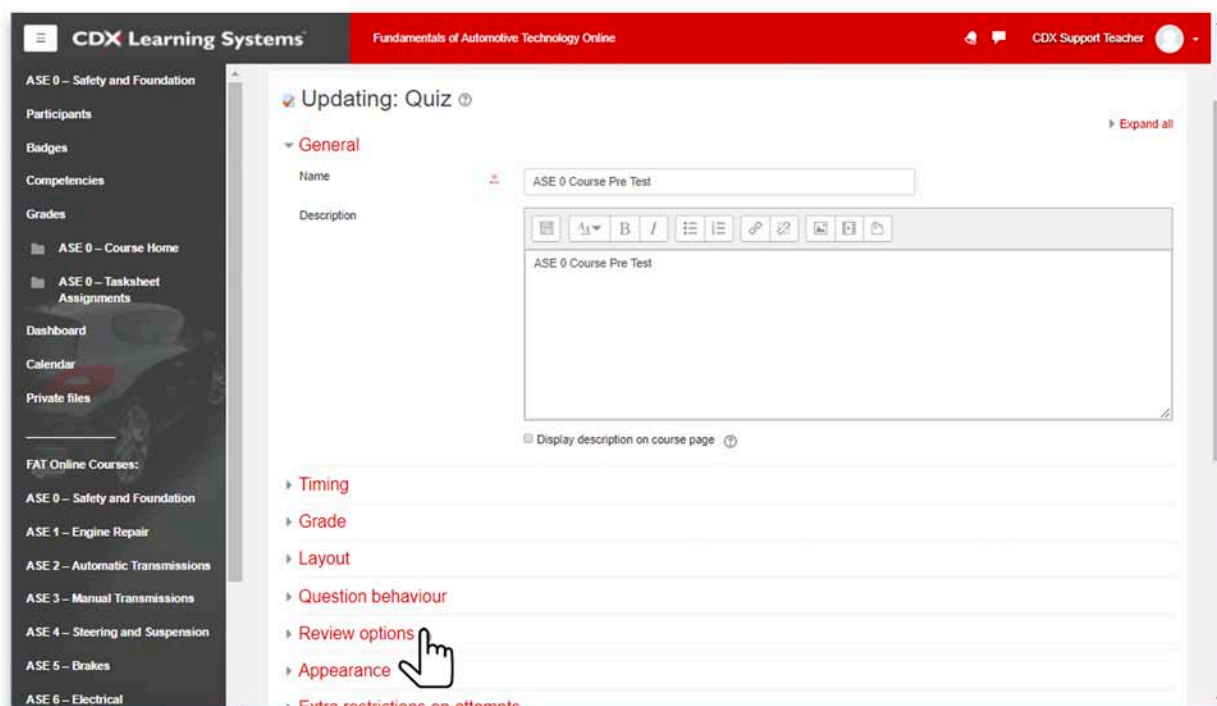

This will open the quiz in a new window.

Find and click on the gear icon in the upper right corner of the page, then select **Edit Settings**.

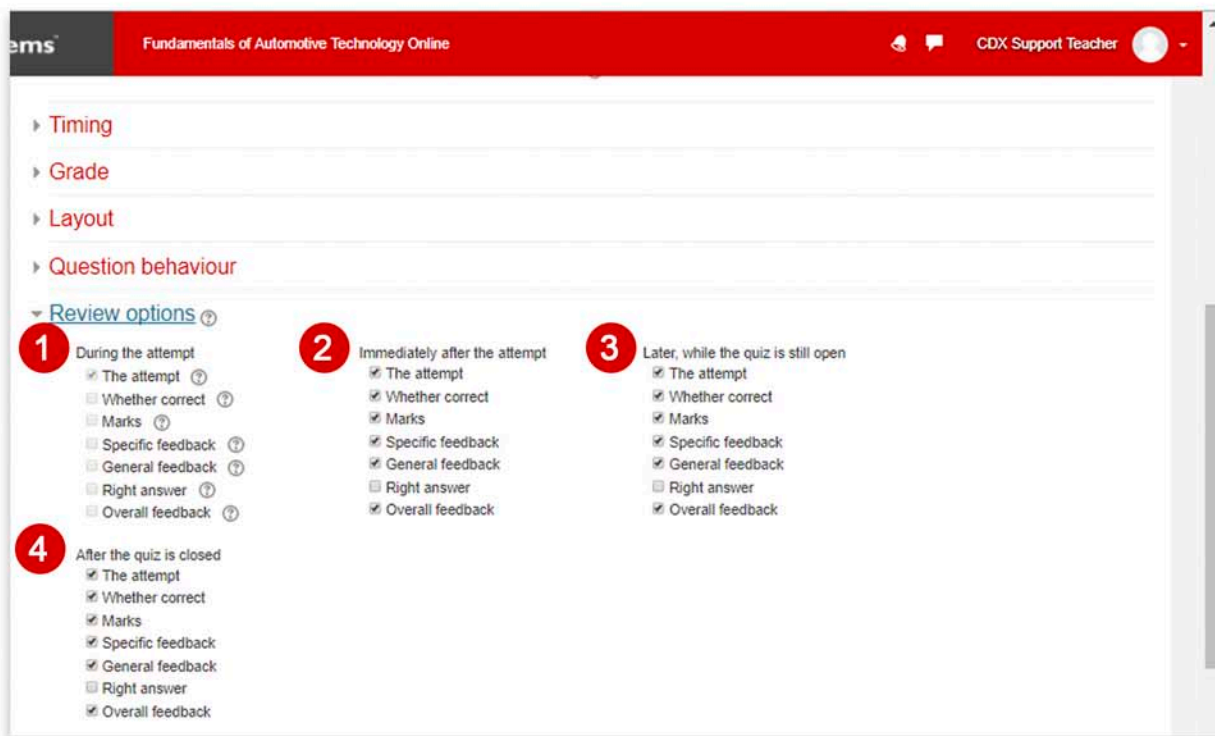

This will bring you to the Quiz Settings page.

Find and Click on the Review options heading to view the Review Options settings.

You will see four columns for what review options students will be able to see and when they will be able to see them.

During the Attempt¹ dictates what students can see while they are working on the assignment

Immediately after the Attempt² dictates what students can see after they've submitted their attempt.

Later, While the Quiz is Still Open³ dictates what they can see after they've submit their attempt, but before the assignments is due.

After the Quiz is Closed⁴ dictates what they can see after they've submit their attempt, but after the quiz due date has passed.

If you have any questions of what a setting controls, find and click on the question mark button next to that option under the During the Attempt Column. This will open a new window with a brief decriptio of that setting.

Once you have set the Review Options, scroll to the bottom of the page and click on the Save and Display button to save your settings and return to the assignment.
